INFORMATION ABOUT POSSIBLE RISKS OF TREATMENT:
You have the right, as a patient, to be informed about your condition and the recommended integrative and complementary procedure to be used so that you make an informed decision whether or not to undergo the procedure after knowing the risks and hazard involved. This disclosure is not meant to scare or alarm you; it is required by law, and is simply an effort to make you better informed so you may give or withhold your consent to the procedure. You have the right to refuse participation at any point, before or during the procedure.

Doctors of Chiropractic, Medical Doctors, and Physical Therapists using manual therapy treatments for patients with headache and cervical spine (neck) complaints, are required to explain that there have been rare cases of injury to a vertebral artery as a result of treatment. Such an injury has been known to cause a stroke, sometimes with serious neurological damage. The chances of this happening are estimated to be approximately from 1 per 400,000 treatments to 1 per 10 million treatments. Appropriate tests will be performed to help identify if you may be susceptible to this type of injury; you will be notified if that is the case. If you have any questions about this, please do not hesitate to speak with your practitioner.

As with any health procedure, complications may arise during treatment. These complications include bruising, soreness, muscle or ligament strain, dislocations, fractures, disk injuries, or burns. These are extremely rare occurrences.

I authorize Dr. Joy K. Zasadny, DC, to perform an examination, diagnostic testing and treatment as deemed necessary. I certify that the information I have provided is correct to the best of my knowledge, and I will not hold Dr. Joy responsible for any errors or omissions that may have been made in the completion of this form.
